

Opening Interface of the project :

Description- The interface gives a NFC reader where the student places their ID card which has a NFC tag inbuilt . That NFC tag contains an encrypted roll number which is read by our NFC reader.

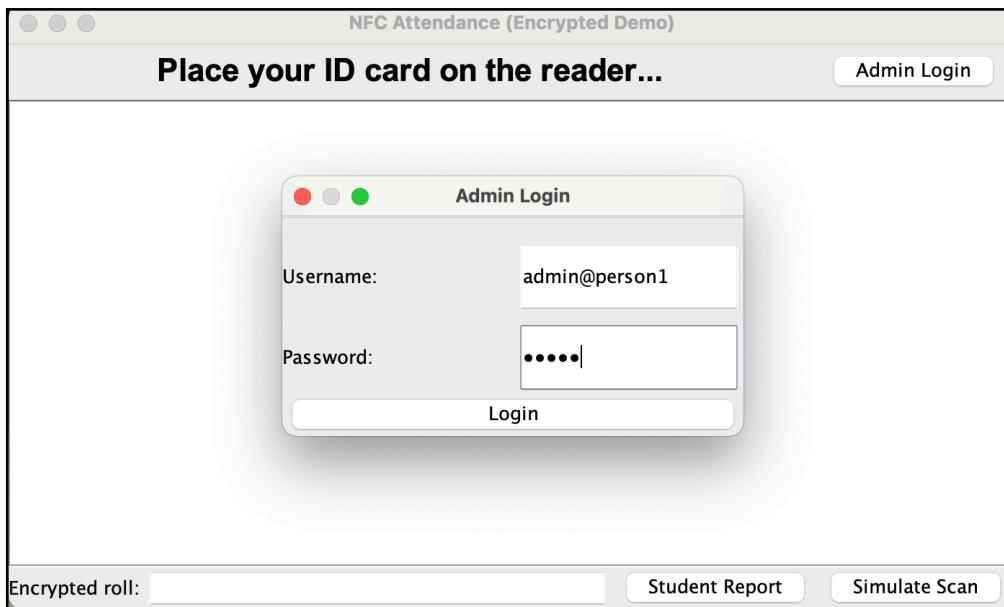

Post attendance Scanning from Students:

Description- After students placing their Id Cards on the reader . The interface shows a attendance marked text with there roll numbers displayed . If there are any error like student not present from our class we show a rejected marking with roll number .

Admin Panel :

we provide a dedicated admin panel which is used by the administrators to view the attendance report which consists of the roll number along with date time of marking attendance

Admin can log in using predefined credentials .He has two dedicated windows one to monitor attendance batch report , Second one Admin can add or remove student records from the database.

Attendance for 23211A05q2				
ID	Roll	Scan Time	Scan Date	Action
8	23211A05q2	2025-12-30 10:32:2...	2025-12-30	Logout
6	23211A05q2	2025-12-30 10:19:5...	2025-12-30	
2	23211A05q2	2025-12-07 11:36:1...	2025-12-07	
1	23211A05q2	2025-12-07 11:05:5...	2025-12-07	

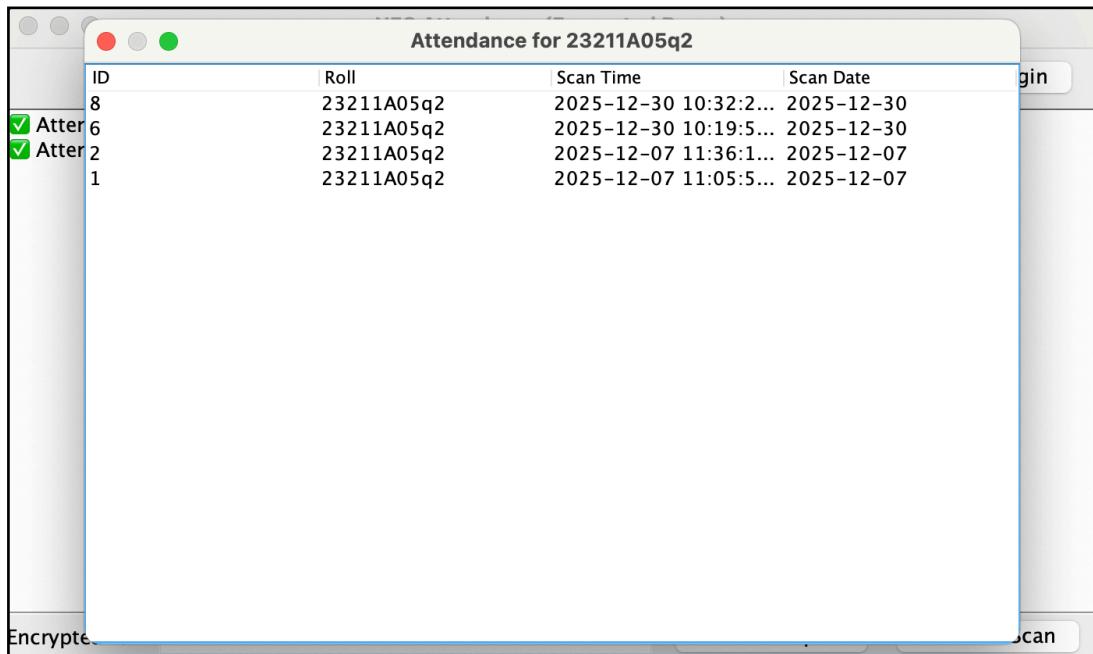

<- Batch report

The screenshot shows a window titled "Admin Panel". It has tabs for "Attendance Report" and "Add / Remove Student". The "Attendance Report" tab is active. On the left, there are fields for "Roll Number:", "Name:", "Branch:", and "Year:". On the right, there are four large text input fields. At the bottom, there are "Add Student" and "Remove Student" buttons.

Managing Students Section ->

Students View of Attendance Report:

Unlike Admin can view consolidated attendance reports of all students. Students can view their individual attendance records

Attendance for 23211A05q2			
ID	Roll	Scan Time	Scan Date
8	23211A05q2	2025-12-30 10:32:2...	2025-12-30
6	23211A05q2	2025-12-30 10:19:5...	2025-12-30
2	23211A05q2	2025-12-07 11:36:1...	2025-12-07
1	23211A05q2	2025-12-07 11:05:5...	2025-12-07

FUTURE SCOPE:

The system is designed to support future enhancements such as stronger encryption mechanisms, improved security controls, and optimized attendance validation logic, ensuring scalability and reliability for real-world use.
